

Teaching foreign language using modern pedagogical innovations in Uzbekistan

The student of UZSWLU

Mo'minjonova Ozoda

Teacher: Kulmamatova Aziza

Abstract: The topicality of the subject matter of this article is revealed by the fact that there are many students as a whole. Countries around the world learn English, so foreign language education, especially English Easier and more effective with the help of various innovations. The use of innovation is based on improvement. Areas of vocabulary and grammar; various skills: reading, listening, speaking, writing. It involves various innovations. It's important to be clear what your main goals are to focus on in the lesson.

With the realization of self-employment, we are currently working on reforming the entire education system. The system was heavily concentrated in the Republic of Uzbekistan. According to the standard Special attention is paid to intellectuals, documents that regulate the educational process continued educational work on next-generation development and planning . The process of updating foreign language learning by young people. Individually psychological: The characteristics of young people and their ability to learn a foreign language are taken into consideration. Islam Karimov, the first president of Uzbekistan, said, "On further measures. "Improvement of Foreign Language Learning System" was approved on December 10, 2012. Improve foreign language education, training and referrals to professionals with excellent language skills. Advanced technology for educational systems. Depending on the resolution and foreign language, mainly in English, taught from first grade in all schools in Uzbekistan . The game is playing. Alphabet, reading and grammar are taught from the second grade. In our country, modern pedagogy and the conditions for teaching a foreign language in a foreign language. Communication technology. Contribute to the creation of new methodologies for learning a foreign language. Education at all levels using modern education and information technology insist on time. This resolution is the rationale for work done in this direction. As the result of implementing this decision is the process of organizing ongoing research abroad. Language is improved and provides young people with the opportunity to provide a modern language. Pedagogical-systematic material at all stages of learning. This document is a logical continuation "Enactment of laws on "education" and "national programs for human resource development". Learning a foreign language without using multimedia learning has become essential tool. Of course, important tasks for foreign language education methodologies are also part of this. Explain the actual process of communication in English and provide a way to create it. An educational environment that provides real-world conditions for learning how to use a target

language. His culture. The most important group of benefits is to learn the benefits of computer-based learning education. For example, teachers take advantage of computer capabilities that respond instantly to input information. Create a simple training program in the form of exercises. Technical benefits of education: English with multimedia technology is a sound card that allows users to record their own sound card. Enter the language and compare it with the pronunciation of the native speaker. The graphics function of the computer is an image or animation. This is especially important when learning a new vocabulary, as the image will be displayed on the monitor. Allow students to directly relate English phrases to actions rather than their own phrases native language. In addition, media is an excellent means of interactive communication. Between different language groups, this is especially apparent with the use of computers network. This can be a local network connecting multiple computers, or the Internet. A global network of millions of users. Targeted use of internet materials in foreign language classes at non-verbal high schools . Educational institutions offer the opportunity to effectively solve many lessonary challenges. they are: - Improve your reading comprehension; Vocabulary expansion in modern foreign languages; Monological and Discussions on interactive language skills and internet materials. Formation of stable motivation.
