Abstract: This dual education in the article system sewing in the direction of application analysis Dual education theoretical knowledge practice with harmony through students professional skill to increase service This will do . of the system main advantages as practical experience increase, modern technologies mastery and to work location of possibilities increase record Also, resources lack of organization problems and qualified of the students enough not being such as see the shortcomings too is issued. Tailoring dual education in the field system development personnel preparation quality in increasing important importance profession will reach.

Key Keywords: Dual education, sewing, practical education, modern technologies, skilled personnel, production release experience, education institutions, enterprises cooperation, education quality increase

Introduction: Dual education system is theoretical knowledge working release practice with soothing education shape to the students professional skill increase opportunity gives. Tailoring in the field this of the system application to the field qualified experts delivery in giving important importance profession This dual education in the thesis sewing in the direction of advantages and disadvantages analysis will be done.

Advantages

1. **Practical knowledge and skills increase** Dual education in the system students theoretical knowledge study with together, in practice them reinforcement as far as possible has will be. Tailoring in the field this is especially true for betting technologies, equipment with work such as in aspects important.
2. **Production release experience increase** Students dual education in the process in enterprises work experience they get, this to them in the future to work location makes it easier .
3. **Modern technologies mastery** In enterprises practice passing students modern sewing machines and technologies with work to the possibility has they will be .
4. **To work location opportunities increase** Dual from education past students qualified frame as enterprises by to work acceptance to be done probability high will be .
5. **Enterprise and training institutions cooperation** This system enterprise and education institutions cooperation strengthens, this and education quality to improve service does.

Disadvantages

1. **Resources shortage** Tailoring enterprises all students practice with provide for enough to resources has not to be It is possible. students number and enterprises to the power is related .
2. **Teachers and of the masters qualification level** Dual education in the process teachers and practice leaders qualification low if so , this education to the quality negative impact to show possible .

3. **Organizational problems** Enterprise and education institutions between compatibility absence or wrong planning students reading process make it difficult possible.
4. **Adaptation problems** Students for enterprise environment and working release to the conditions adaptation difficult to be possible.
5. **Students in the evaluation differences** Practice in the process in enterprises assessment criteria education in institutions from the criteria difference to do this and general evaluation make it difficult possible.

Summary: Tailoring in the direction of dual education system many to the advantage has although some disadvantages available. This shortcomings eliminate to grow for enterprises and education institutions between cooperation strengthen, qualified teachers attraction to do and students encouragement system on the road to put necessary. Tailoring in the field dual education system development national economy and personnel preparation quality in increasing important importance has.
